SUMMARY

Seasoned Salesforce Developer with over 9 years of experience, boasting a robust track record of crafting efficient business solutions, optimizing workflows, and streamlining processes. Proficient in designing and implementing both technical and functional solutions that enhance efficiency while reducing operational costs. Well-versed in Building Flows, APEX, LWC, Platform Configuration, Business Analysis, Integration, DevOps, and AI Agents. Possesses exceptional communication and leadership skills, thriving in dynamic, fast-paced business environments.

HIGHLIGHTS

- ➔ Strong written, verbal communication skills, comfortable working in a larger team environment (10+ people).
- ➔ Extensive hands-on experience in Experience, Service, Sales, Health and Education Cloud, Omni Studio, CPQ, Data Cloud, Agent Force.
- ➔ Proficient creating Apex classes, Lightning Web Components, VF pages, Flows, Aura Components, and Triggers.
- ➔ Collaborates with stakeholders to analyze business processes and functional requirements.
- ➔ Demonstrated hands-on experience in the analysis, design, development, and testing of SFDC applications.
- ➔ Expertise in analyzing organizational processes, translating business workflows into precise Salesforce workflows, and configuring Salesforce to align with business requirements.

WORK EXPERIENCE

Senior Salesforce Developer

Federal Reserve Bank of Chicago (08/2022 to Present)

- ➔ Implemented Salesforce Data Cloud and Agentforce solutions to develop AI-powered employee support agents for HR operations.
- ➔ Enabled automated responses to employee questions related to benefits, leave policies, company procedures, and internal support processes.
- ➔ Develop and design end-to-end Salesforce solutions using configuration and customization in Experience Cloud.
- ➔ Built scalable LWCs for Experience Cloud using SLDS, HTML, CSS, JavaScript, and Lightning Data Service (LDS).
- ➔ Designed secure integrations with external systems via REST APIs and Platform Events.
- ➔ Continuously improved CI/CD pipelines to strengthen deployments, releases, and code quality across orgs.

Salesforce Consultant (Developer)

Slalom LLC (03/2020 to 08/2022)

- ➔ Researched solutions, formulated design proposals, and created demos to solve requests from business partners.
- ➔ Created Apex triggers, API schemas for external objects, Apex classes, and Lightning Web Components.
- ➔ Identified opportunities for process optimization, process redesign, and new process development to reduce cost, improve quality, and drive revenue growth.
- ➔ Delivered extensive OmniStudio development for both standard and custom forms.
- ➔ Developed and configured Einstein Bots to improve self-service and drive case deflection.
- ➔ Developed and designed deployment processes using Gearset, Copado, GitHub, and GitLab.
- ➔ Led conceptual and technical solution designs for feature improvements.
- ➔ Performed front-end development with LWC and back-end development with Apex.

Salesforce Developer

CoreLogic (05/2016 to 03/2020)

- ➔ Developed, maintained, and improved Visualforce pages, Apex, triggers, Lightning components, and Apex unit tests.
- ➔ Provided technical assistance and end-user troubleshooting for bug fixes and enhancements.
- ➔ Managed and recommended changes to integrations between Salesforce and other platforms.
